ELECTRIC STING

FSAE EV RACING

2026-2027 SPONSORSHIP PROPOSAL

Sacramento State's First Ever Formula SAE Electric Team

BUILT BY STUDENTS. POWERED BY
INNOVATION. BACKED BY PARTNERS.
EST. 2025

BUILT FROM ZERO.
BUILT TO COMPETE.

Founded in 2025, Electric Sting Racing was established by Sacramento State Students with a shared ambition: to bring electric motorsport to campus and create and environment where engineers from different disciplines can design, innovate, and build together

Our mission is to design, build, test and compete with our first ever car in the 2027 Formula SAE competition.

What started as an ambitious idea is now becoming a reality. With initial funding, components donated to us, and development underway, our team is laying the foundation for a competitive electric racing program.

WE ARE BUILDING MORE THAN A RACE CAR. WE ARE BUILDING A FUTURE.

MISSION STATEMENT

Our mission is to build and compete with high performance electric race cars while developing the next generation of engineers through hands-on innovation, technical excellence, and teamwork.

CSUS Engineering

WHERE EDUCATION MEETS INNOVATION.

Sacramento State's College of Engineering and Computer Science is recognized for its commitment to undergraduate engineering education, preparing students through rigorous academics, applied learning, and hands-on technical experience.

Electric Sting Racing builds on this foundation by bringing students together to apply their engineering knowledge to the design and development of a Formula SAE electric race car.

#8 Civil Engineering	#11 Computer Engineering
#17 Electrical Engineering	#33 Mechanical Engineering

ONE YEAR. ONE CAR. ONE FINISH LINE.

SPRING 2026

LAUNCH

- Introduced ourselves to the campus community
- Held our first meeting with 20+ attendees
- Held our first workshop with 16+ attendees

SUMMER 2026

ORGANIZE

- Established our subsystems and teams
- Organized workshops for members to learn hands on skills

FALL 2026

DESIGN

- Complete vehicle CAD and subsystem design
- Secure funding and prepare for manufacturing
- Finalize engineering documentation and component selections

SPRING 2027

BUILD + TEST

- Manufacture and assemble the vehicle
- Integrate electrical and mechanical systems
- Validate vehicle performance and safety

SUMMER 2027

COMPETE

- Bring Electric Sting to Formula SAE Electric and put the first car on the competition stage

THE SYSTEMS THAT DRIVE US.

VEHICLE INTEGRATION

Brings the vehicle together, validates safe operation as a complete system.

ESTIMATED BUDGET: $6000

COCKPIT CONTROLS

Connects the driver to the vehicle through essential controls, displays, and safety systems.

ESTIMATED BUDGET: $2500

HIGH VOLTAGE

Powers and propels the vehicle by safely delivering energy from the battery to the motor.

ESTIMATED BUDGET: $14000

FRAME

Provides structural foundation of the vehicle, supporting critical systems while also protecting the driver.

ESTIMATED BUDGET: $5500

SUSPENSION

Maintains tire contact and vehicle stability to deliver predictable handling and performance on the track.

ESTIMATED BUDGET: $5000

INVEST IN THE FUTURE

Partnering with Electric Sting Racing means investing in more than just a race car. It means supporting the next generation of engineers.

01 – Connect with emerging talent

Build relationships with motivated engineering students developing practical skills in design, manufacturing, electronics, and software

02 – Increase brand visibility

Gain recognition through social media, sponsor acknowledgements, and potential branding opportunities on our vehicle and team materials

03 – Support Real Engineering

Help transform engineering concepts into reality through financial contributions, component donations, manufacturing services, and technical guidance

04 – Build a lasting partnership

Become apart of Sacramento states growing electric motorsport program and help create opportunities for future generations of student engineers

SPONSOR TIERS

BENEFIT	$5000+ PLATINUM ORCHID	$3500+ GOLD ROSE	$1500 + SILVER TULIP	$500+ BRONZE LEAF
LOGO ON THE CAR	Large premium car location	Medium visible side or front bodywork	Small secondary body work location	Extra small in a secondary body work location
WEBSITE RECOGNITION	Large logo + company website link + home page placement	Large logo + company website link	Medium logo + company website link	Small logo + company website link
SOCIAL MEDIA RECOGNITION	1 Story announcement + 1 post	1 Story announcement + 1 post	1 Story announcement	1 story announcement
PROGRESS UPDATES	Monthly progress checkins	Fall and spring	Post season summary	No
TEAM EVENT INVITATIONS	Yes + exclusive meetings + private engineering presentations	Yes and exclusive showings	Yes	No
RESUME	Direct networking and resume uploads	resume upload and networking event	resume sending	Recruiting opportunities
MERCHANDISE	Logo on merchandise + free T shirt	Logo on merchandise + free keychain	Logo on merchandise + free sticker	Logo on the merchandise

We also accept in kind donations such as material, services, and components
